

Musharib Rehman

UNDERGRADUATE

About Me

I am a Computer Science undergraduate with a strong interest in web development, problem-solving, and evolving technologies. I enjoy learning new skills and applying them to real-world projects. With a base in programming, and web development, I am ready to work with teams and grow through practical experience. Currently seeking internship or entry-level opportunities to further develop my technical and professional skills.

Projects

Food Ordering Web App – ReactJS, MongoDB

- Built responsive UI with React Hooks and reusable components
- Integrated MongoDB for dynamic menu and order data
- Implemented filtering, cart, and full frontend architecture
- Independently managed entire development lifecycle

E-Commerce Management System – SQL

- Designed normalized database for products, orders, and users
- Created queries, triggers, and stored procedures for automation
- Optimized performance through indexing and query tuning

ATM Banking Simulation – Assembly (x86, emu8086)

- Developed secure, menu-driven ATM system in Assembly
- Implemented login, withdrawals, deposits, and transfers
- Applied low-level memory operations and error handling

Restaurant Ordering System with SJF Scheduling – C++

- Simulated order scheduling using SJF algorithm
- Included billing, order summary, and payment logic
- Used Peterson's Solution for thread-safe operations

Work Experience

Co-Founder of Alif-Noon

Aug 2020 - present

- Co-founded and manage a boutique clothing brand with both physical and online presence
- Designed and maintain the company website, handling digital storefront and customer engagement
- Oversee inventory, order processing, and day-to-day operations
- Lead customer service, styling consultations, and issue resolution
- Plan and execute marketing campaigns and seasonal product launches
