PROFILE

I am a Computer Science undergraduate with a strong interest in web development, problem-solving, and evolving technologies. I enjoy learning new skills and applying them to real-world projects. With a base in programming, and web development, I am ready to work with teams and grow through practical experience. Currently seeking internship or entry-level opportunities to further develop my technical and professional skills.

WORK EXPERIENCE

Software Development Projects | Self-Learning & Academic Experience

- Developed web and desktop applications using Python, React, JavaScript, and Assembly Language.
- Built an AI-powered virtual try-on platform utilizing deep learning techniques.
- Implemented inventory management, banking, and restaurant ordering systems through academic and personal projects.
- Utilized Git and GitHub for version control and collaborative development practices.
- Open to internship and junior developer opportunities to gain practical experience and grow as a software engineer.
